@mehrandevs

Mehran Sharifi

FRONT-END DEVELOPER

Front-end developer with strong full-stack command of Next.js. I handle full CRUD operations on both the front end and the back end, including designing and writing MongoDB schemas myself. Skilled in building responsive, user-focused interfaces with React, Tailwind and MUI, and in connecting to REST APIs. Actively looking for front-end opportunities with companies in Germany.

PROJECTS

E-Commerce Platform

Next.js Full-Stack · Live and under active development

- A complete online store built with Next.js and MongoDB; I implemented the database design, API, authentication and user interface on my own
- Admin panel for managing categories, products, inventory and discount codes
- User authentication with SMS one-time codes (OTP) and NextAuth
- Shopping cart and checkout flow, including address selection, shipping cost and order placement
- Discount code system with Persian (Jalali) calendar support
- MongoDB schemas and data relations with Mongoose, referential integrity checks before deletion, and consistent error handling across front end and back end
- Live site: https://nextjs-shop-devs.vercel.app/
- Source code: https://github.com/mehrandevs/nextjs-shop
- Viewing note: the database runs on MongoDB Atlas, so a VPN needs to be on to view the site

Landy — Responsive Landing Page

HTML, CSS, Bootstrap

- Built and localized a fully responsive one-page landing template with sections for features, showcase, pricing and contact
- Mobile-first responsive layout with HTML, CSS and Bootstrap
- Deployed with GitHub Pages
- Link: https://mehrandevs.github.io/Landy/

TECHNICAL FOCUS

- Full-stack development with Next.js: API routes, server-side logic and schema design in MongoDB
- User interface development with React and Next.js (App Router)
- Responsive UI design with Tailwind CSS, MUI and Bootstrap
- REST API integration and version control with Git and GitHub
